ABOUT US:

Sarojini Naidu Vanita Pharmacy Maha Vidyalaya (SNVPMV) is a premier institution committed to empower women through excellence in pharmaceutical education and research. Established in 1997-98 and sponsored by the Exhibition Society. SNVPMV is located in Tarnaka, Secunderabad, affiliated to Osmania University and approved by the Pharmacy Council of India (PCI) New Delhi.

The college offers a range of programs, including undergraduate (B. Pharm), postgraduate (M. Pharm) with five specializations—Pharmaceutics, Pharmaceutical Analysis, Pharmaceutical Quality Assurance, Pharmacology, and Pharma Regulatory Affairs—as well as Pharm. D and Pharm. D (PB). SNVPMV boasts world-class infrastructure designed to simulate an industry-like working environment. The facilities include modular labs, E-Classrooms with LED projectors, a high-tech computer lab, an auditorium, a seminar hall, and a well-stocked library with extensive resources. Our dedicated, research-oriented faculty, many of whom hold doctoral degrees in pharmacy, are fully committed to academic excellence. They engage in cutting-edge research while imparting quality education, fostering critical thinking, problem-solving, and leadership skills essential for building competencies in students. The faculty works collaboratively on research projects, involving both UG and PG students in R&D activities. As an institution, SNVPMV has consistently fostered academic excellence, instilled leadership values, and empowered women to excel in pharmaceutical sciences and make meaningful contributions to society. Recently, we celebrated a significant milestone—25 years of academic excellence, research innovation, and contributions to the field of pharmaceutical education—marking the successful completion of our Silver Jubilee Celebrations.

The increasing demand for Pharmaceutical Quality Assurance (PQA) professionals in the pharmaceutical industry, driven by the growing complexity of regulatory requirements and the need for high-quality standards in drug manufacturing and distribution, has led to the establishment of the Pharmaceutical Quality Assurance Department in our college. The first batch of students has successfully completed the program, and the second batch is about to graduate, further enhancing the pool of skilled PQA professionals to meet the industry's evolving needs.

Objective of FDP:

"Pharma Quality Assurance and Regulatory Affairs: A Collaborative Approach"

The objective of this e-Faculty Development Program is to provide faculty with a comprehensive understanding of quality assurance principles and regulatory frameworks governing the pharmaceutical industry. Through interactive sessions and expert insights, the program aims to:

1. Equip faculty and researchers with the latest advancements in quality management systems and regulatory practices.
2. Foster a collaborative approach between academia, industry, and regulatory bodies to enhance the pharmaceutical value chain.
3. Develop skills for addressing challenges in compliance, validation, and documentation processes.
4. Highlight the importance of aligning academic curricula with contemporary regulatory requirements.
5. Encourage innovation and critical thinking in implementing robust quality assurance measures.

This e-FDP seeks to bridge the gap between academic expertise and industry expectations, ensuring participants are well-versed in current trends and future directions in pharma quality assurance and regulatory affairs.

Program Highlights:

- Duration: Six days of comprehensive learning and networking.
- 12 Guest Lectures from eminent National and International academicians and industry professionals
- Interactive, Q&A sessions.
- e-Certificate of participation for attendees.
