NBA Accredited B.Pharmacy Course - NAAC Accredited with A+ Grade
UGC AUTONOMOUS INSTITUTION

Ref.: SNVPMV/

Date : 24/3/2026

CIRCULAR

Attn: Students of M Pharm, B Pharm Final Year & Pharm V & VI Year students

We are pleased to inform you that Career Guidance, Training & Placements (CGT&P) of our institution is organising a capacity building program with the following details.

Date & Time: 25.03.2026 from 1:30 to 3:30 PM

Speaker: Sri U. V. Narasimha Murthy

Topics:

1. Handling the data Discrepancies in Clinical Data Management
2. Global PV Practices including MeDRA
3. CRO Business Opportunities in India

Speaker: Dr. Vanishree Daruri

Topic:

Medical Coding 2026: The Strategic Value of AAPC-CPC Certification in Pharmacy Careers

Date & Time: 25.03.2026 from 3:30 to 4:30 PM

Organised by: Department of Regulatory Affairs

Venue: SNVPMV Auditorium

All M Pharm, B Pharm Final Year & Pharm D V & VI Year students are required to attend the said Capacity Building Program. Arrangements are being made to provide you with the relevant study materials and presentations for your reference.

(Dr. N. Srinivas)
HOD - Regulatory Affairs
CGT & P In-Charge.

(Dr. T. Mamatha)
Principal
Sarojini Naidu Vanita Pharmacy Maha Vidyalaya (Co-Ed.)
UGC Autonomous Institution
Vijayapur Colony, Tarnaka, Secunderabad-500 017.

REPORT ON CAPACITY BUILDING PROGRAM ON THE IT-ENABLED
PHARMA SECTOR

A total of 115 students from Bachelor of Pharmacy (B. Pharm) and Master of Pharmacy (M. Pharm) programs attended the seminar, reflecting a significant level of academic engagement and interest in emerging domains within the pharmaceutical and healthcare industries. The seminar presentations comprehensively highlighted the increasing importance of the information technology (IT)-enabled pharmaceutical sector, with particular emphasis on Clinical Data Management (CDM), Global Pharmacovigilance (PV), and the Clinical Research Organization (CRO) market.

In the domain of Clinical Data Management, considerable focus was placed on the critical role of query management systems in ensuring the accuracy, consistency, and reliability of clinical trial data. These systems are instrumental in identifying discrepancies, inconsistencies, or missing information within datasets. Queries may be generated through both automated validation checks and manual review processes, and are systematically tracked, assigned, and resolved to maintain a robust audit trail. This structured approach ensures adherence to regulatory standards and preserves data integrity. Furthermore, the integration of advanced technologies such as real-time data access, process automation, and artificial intelligence (AI)-based query detection significantly enhances operational efficiency, reduces turnaround time, and strengthens compliance in clinical research activities.

Global Pharmacovigilance practices were also discussed in detail, underscoring their essential role in ensuring drug safety in the post-marketing phase. Pharmacovigilance encompasses a range of systematic activities, including the detection, assessment, monitoring, and prevention of adverse drug reactions (ADRs). Key processes such as adverse event data collection, case processing, signal detection, and regulatory reporting form the backbone of effective PV systems. A crucial element supporting these functions is the Medical Dictionary for Regulatory Activities (MedDRA), a globally recognized standardized medical

Accredited A+ Grade by NAAC

terminology. MedDRA facilitates uniform coding and clear communication of safety data across international regulatory environments. Its hierarchical structure enhances the precision, consistency, and efficiency of safety reporting, thereby enabling informed decision-making and contributing to improved public health outcomes.

The seminar further explored the rapidly expanding Clinical Research Organization (CRO) market, with particular reference to its growth trajectory in India. The Indian CRO sector is witnessing substantial expansion due to several competitive advantages, including cost-effectiveness, access to a large and diverse patient population, availability of a skilled workforce, and continuous improvements in infrastructure. CROs provide a wide spectrum of outsourced services across the drug development lifecycle, encompassing clinical trial management, data handling, regulatory support, and advanced analytics. The market is projected to grow significantly, driven by increased global outsourcing, rising complexity in clinical studies, and the integration of AI and digital technologies. Nevertheless, certain challenges persist, including regulatory uncertainties, patient recruitment constraints, and pricing pressures. Overall, these developments illustrate how the convergence of technology, global standards, and outsourcing is transforming the pharmaceutical industry into a more efficient, data-driven, and globally interconnected ecosystem.

In addition, the seminar addressed the critical role of medical coding as a foundational component of the healthcare system. Medical coding involves the systematic conversion of medical diagnoses, procedures, and healthcare services into standardized alphanumeric codes. This process ensures accurate documentation, facilitates insurance claims and reimbursement processes, and supports large-scale data analysis and medical research. Various countries adopt specific coding systems such as ICD-10, CPT, and HCPCS, making medical coding a globally standardized yet regionally adapted practice. With the increasing adoption of digital health technologies, telemedicine, and artificial intelligence, the medical coding industry is experiencing rapid growth and is expected to expand further in the coming years, thereby generating substantial demand for skilled professionals.

Accredited A+ Grade by NAAC

Furthermore, the field of medical coding offers diverse and promising career opportunities, ranging from entry-level coding roles to advanced positions in quality assurance, healthcare analytics, regulatory compliance, and project management. Professional certifications, including Certified Coding Associate (CCA), Certified Coding Specialist (CCS), Certified Professional Coder (CPC), and Registered Health Information Technician (RHIT), play a vital role in enhancing employability and career advancement. Structured training programs equip candidates with comprehensive knowledge of human anatomy, coding systems, and regulatory frameworks, along with practical exposure to real-world scenarios. In the Indian context, medical coding is emerging as a stable and flexible career pathway, offering competitive remuneration, opportunities for remote employment, and strong long-term growth prospects, particularly for graduates in life sciences and healthcare disciplines.

Impact

The four presentations collectively highlight the significant impact of digital transformation in the pharmaceutical and healthcare sectors. Clinical Data Management systems improve data accuracy, integrity, and compliance through structured query management and real-time validation processes. Global Pharmacovigilance practices enhance patient safety by ensuring continuous monitoring of adverse drug reactions and maintaining a strong benefit–risk balance. The adoption of standardized terminology like MedDRA enables consistent global communication and efficient regulatory reporting. Meanwhile, the rapid growth of the CRO industry, especially in India, demonstrates how outsourcing and cost advantages are reshaping drug development processes. Additionally, medical coding plays a vital role in standardizing healthcare data, supporting billing systems, and enabling data-driven decision-making across healthcare systems.

Outcomes

As a result of these advancements, the pharmaceutical and healthcare industries are becoming more efficient, transparent, and globally integrated. Improved data management and coding practices lead to faster clinical trial completion, better regulatory compliance, and reduced

errors. Enhanced Pharmacovigilance systems ensure early detection of drug safety issues, ultimately protecting public health. The expansion of CROs creates employment opportunities and strengthens India's position as a global research hub. Furthermore, the growing demand for skilled medical coders and data professionals opens up stable career paths with opportunities for remote work and career progression. Overall, these developments contribute to a more patient-centric, technology-driven healthcare ecosystem with improved quality and accessibility.
