Date :

Date: 25/04/2026

CIRCULAR

Attn: Students of M Pharm, B Pharm Final Year & Pharm D students

We are pleased to inform you that we are organising a one day workshop with NAASCOM (National Association of Software and Service Companies) future skills Prime in our Institution with following details.

Date & Time: 27.04.2026 from 10:00 onwards

Organised by: Department of Regulatory Affairs

Venue: SNVPMV Auditorium

Speakers

M. Srinivas Goud (Senior Trainer)

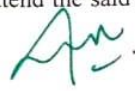

P. Vishal (Senior Trainer)

Topics

1. GEN AI 101
2. DIGITAL EDGE 101
3. GEN AI TOOLS

All M Pharm, B Pharm Final Year & Pharm D students are required to attend the said one day workshop .

(Dr. N. Srinivas)
HOD_Regulatory Affairs
CGT&P In-Charge.

REPORT ON ONE DAY WORKSHOP ON NASSCOM FUTURE SKILLS PRIME

Date: 27th April, 2026

Time: 10:30 A.M. to 4:30 P.M.

Venue: SNVPMV Auditorium

Total Number of Participants: 137

A one-day workshop on Future Skills – NASSCOM Skills Prime was conducted to enhance students' knowledge and readiness for emerging technologies and industry requirements. The session focused on building practical skills in fields like Artificial Intelligence, Machine Learning, and programming languages, along with guidance on career development.

Inaugural Session

The event commenced with a formal invitation by A. V. Vasanthi B Pharm Final Year and Hrithika B Pharm Third Year as anchors.

The dignitaries were invited on to the stage to preside over the event with an eco greetings.

The distinguished guest Speakers are

P. Vishal – Senior Trainer

Mr. Yashwanth Kumar – Trainer

The event was coordinated by Dr. N. Srinivas Head of Department (Regulatory Affairs) and Placement Officer, SNVPMV.

Introduction

A one-day workshop on Future Skills – NASSCOM Skills Prime was conducted to enhance students' knowledge and readiness for emerging technologies and industry requirements. The session focused on building practical skills in fields like Artificial Intelligence, Machine Learning, and programming languages, along with guidance on career development.

Objectives of the Workshop

- The main objectives of the workshop were:
- To introduce students to future technologies such as AI, ML, and Python
- To provide practical exposure through hands-on sessions
- To bridge the gap between academic knowledge and industry requirements
- To guide students in improving technical and professional skills

Speaker Profile (P. Vishal- senior trainer)

Completed B.Tech in 2016 (59%) , M.Tech with 82%

Experience since 2015 & Worked as:

- Android Developer
- Android Trainer
- Python Developer and Trainer

Key note by P.Vishal senior trainer

The speaker discussed various in-demand technologies, including Artificial Intelligence (AI), Machine Learning (ML), Python programming, C language and Java basics & Introduction to Robotics and Robotic Surgery.

Key note by Mr. Yashwanth Kumar – Trainer

Mr. Yashwanth Kumar explained about NASSCOM (National Association of Software and Service Companies), which acts as a bridge between students and companies by providing knowledge about the latest technologies. It guides software and technology companies and is supported by the Central Government of India. The platform is highly beneficial for students' future and offers many learning opportunities free of cost. Important topics discussed included Deep Learning (DL), Natural Language Processing (NLP), website development, front end, back end, coding, databases, real-time databases, and Data Science with different

Accredited A+ Grade by NAAC

algorithms. From an academic point of view, coding languages are very important for building a strong career in the software and technology field.

Program Overview of Artificial Intelligence and Generative AI

Artificial Intelligence (AI) is a computer-based technology that enables machines and software systems to understand information, learn from data, reason logically, and make decisions. Common examples of AI include chat bots, virtual assistants, and recommendation systems. Generative AI is a branch of AI that can create new content such as text, images, videos, computer code, music, and voice outputs based on user prompts. It works by learning patterns from large amounts of data and then generating meaningful outputs. The major concepts involved in generative AI include neural networks, machine learning, and large language models.

Generative AI has several practical use cases in different sectors such as education, business, healthcare, programming, digital marketing, and agriculture. In education, it can assist students in personalized learning. In healthcare, it supports diagnosis and research. In business, it improves automation and customer support, while in digital marketing it helps in content creation and campaign planning. Every module of the learning program may include quizzes and certification to assess understanding and practical knowledge.

The program also focuses on hands-on skills where students learn how to use AI tools effectively, create digital content, generate code, and prepare professional resumes using AI-powered platforms such as Canva. Learners develop important skills including AI basics, prompting techniques, digital literacy, responsible AI usage, and career direction. Responsible AI emphasizes respecting privacy, ethical usage, and understanding the limitations of AI systems.

After completing the certification, students can further advance into Python programming, which is widely used in AI development. Python helps in understanding variables, inputs, coding syntax, and logic building. Programming can be learned at beginner, intermediate, and advanced levels. For example, a simple Python program can be used to add two numbers by

assigning values to variables and printing the result. This creates a strong foundation for future learning in AI and software development.

Afternoon Session

Certification Program : The workshop introduced a certification program with:

- Module-based learning
- Quiz evaluation system
- Minimum 80% marks required to qualify for the next module
- Certification awarded upon successful completion

Key Highlights

- Emphasis on practical learning and real-time content
- Importance of skills over percentage
- Minimum 75% skill proficiency expected for students
- Discussion on teamwork and continuous skill improvement

During the afternoon session, students were provided with registration links for the FutureSkills Prime platform.

All participants successfully registered on the website and were introduced to its learning resources and opportunities.

After registration, students explored various courses available on the platform, including Gen AI 101, Gen AI Tools, and Digital Edge 101. Each course consisted of multiple modules designed to enhance knowledge and understanding of emerging digital technologies and artificial intelligence concepts.

Students carefully went through the modules of each course, gaining valuable insights into the respective topics. Upon completing the learning modules, they attempted quizzes related to each specific course to assess their understanding and knowledge.

After successfully completing the quizzes, students received certificates for each course. These certificates were then uploaded to the FutureSkills Prime website as part of the completion and verification process.

Overall, the afternoon session was highly informative and practical, providing students with hands-on exposure to advanced digital learning platforms, industry-relevant courses, and certification opportunities that will be beneficial for their academic and professional growth.

Outcome : As an outcome of the workshop:

- Students gained basic knowledge of Python programming
- They understood the importance of continuous skill development
- They became aware of certification pathways and industry expectations
- The session motivated students to improve both technical and teamwork skills

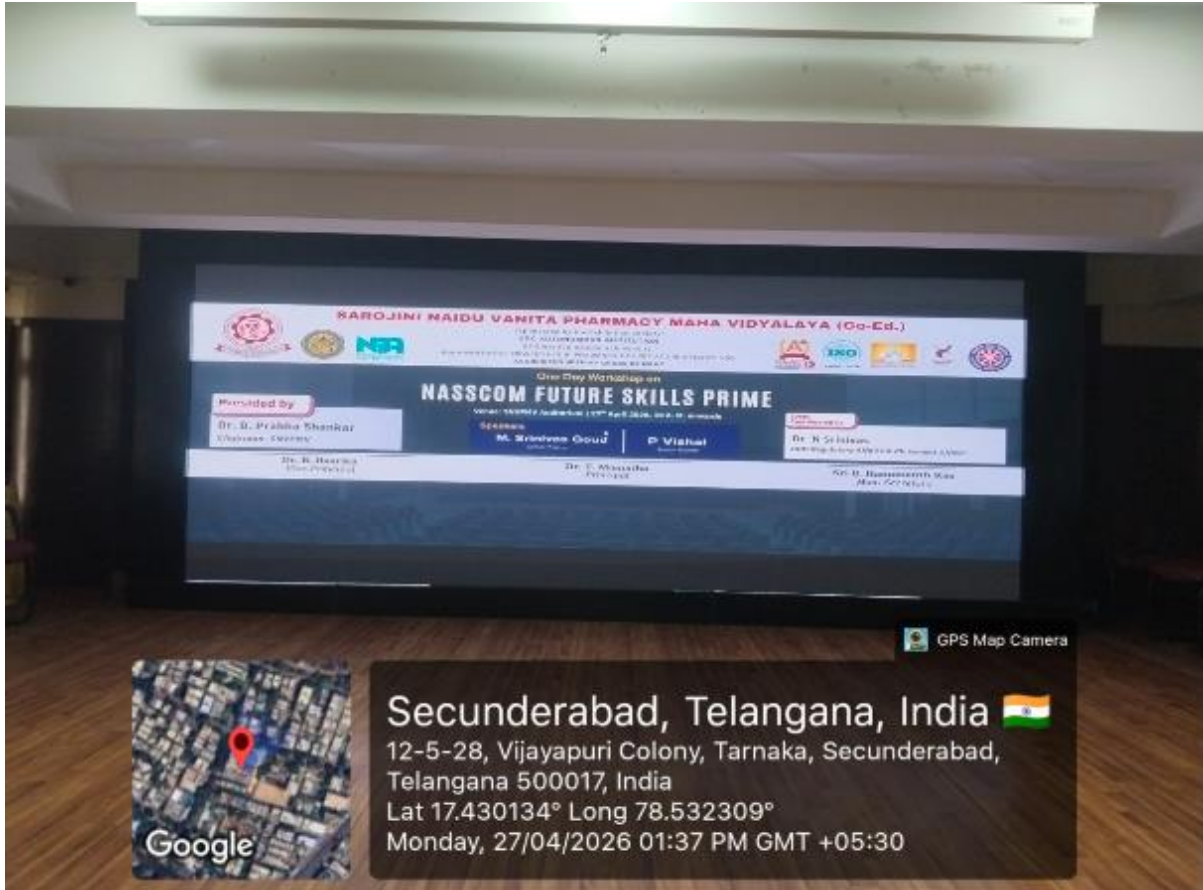

Impact of the Workshop

The workshop had a significant impact on students by:

- Enhancing awareness about emerging technologies
- Improving understanding of practical coding skills
- Encouraging students to focus on skill development
- Providing clarity on career opportunities in IT and software fields
